

Accelerator Overwhelm

[Click here for Google Doc \(Click File > Make a Copy\)](#)

Introduction

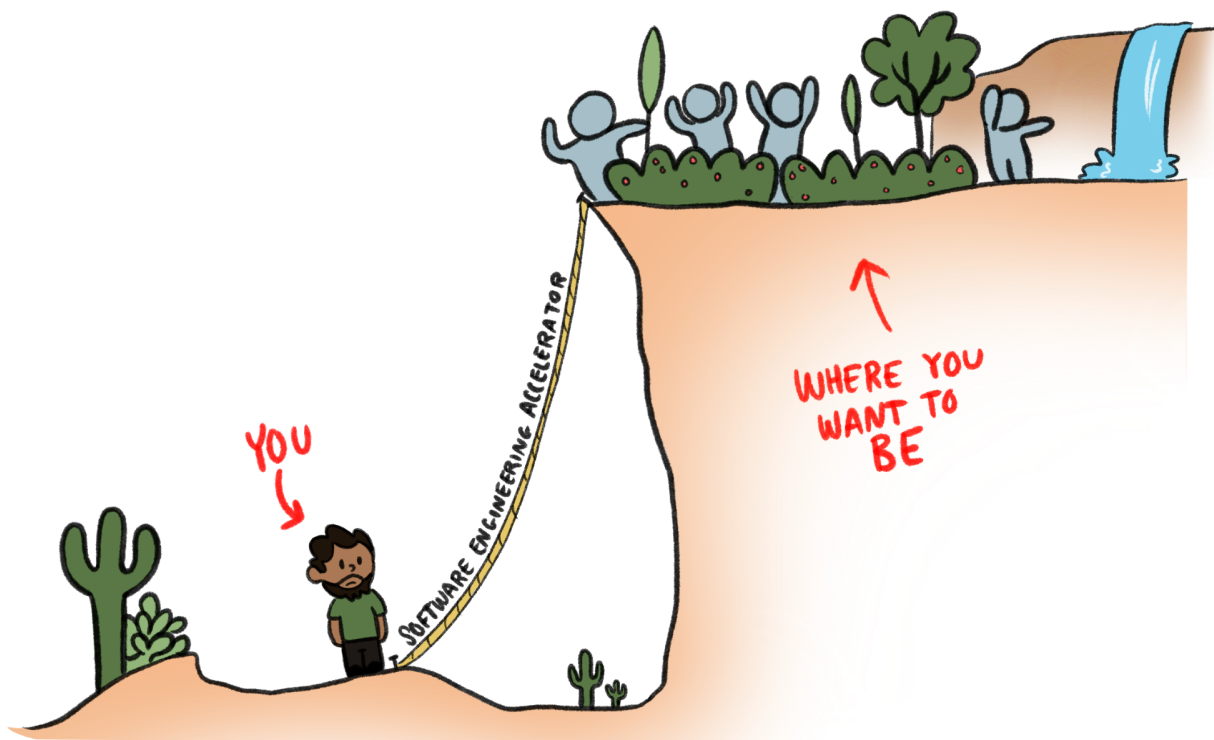

This resource explains the feeling of overwhelm you will inevitably experience when implementing all the systems in the Accelerator and how to manage it.

“Productivity is never an accident. It is always the result of a commitment to excellence, intelligent planning, and focused effort.”
– Paul J. Meyer

Overwhelm is Coming Your Way

Once you start to implement the systems taught in this program, you will start to feel overwhelmed. This video serves to explain what's causing that feeling + give you systems to help alleviate it.

What Causes Overwhelm?

AM

You're used to not having anything – you're used to laying on the ground. Your existence right now is:

- 1) *lack of interviews*
- 2) *lack of OAs*
- 3) *lack of referrals*
- 4) *lack of informational interviews*
- 5) *lack of job offers.*

Now, I know that you've been staring at that Garden up there for quite some time – and the reason you paid money for this program is because you wanted someone to throw you a rope. **Now you have a chance of making it.**

Even though you have a chance, **climbing a rope is not easy.** And once you start, you're going to feel all these emotions bubbling up inside.

Fear / Judgement / Sacrifice / Time Management / Stress / Regret / Disappointment

You must learn to expect these emotions and recognize that they are temporary yet necessary to get to the next level. You have to face them head on.

Constant Velocity / Acceleration

If you're in a car driving at a constant speed, **you don't really feel anything.** It's the same with being in a plane — when the plane reaches cruising altitude, **it feels 100% stable.**

You only feel the Acceleration. *Speeding up, slowing down, and changing direction.*

- Before the program, you were cruising at 20 MPH. Your goal is to reach **50 MPH** and cruise at that point, which is why you bought the Accelerator.
- Well, you're going to feel the Acceleration from 20 mph -> 50 mph and it might not be fun.

This video is like the handle at the top of the car roof.

As you start to Accelerate, you can use that to hold on and help you deal with the feeling of uncertainty. Anytime you feel it, you should come back and rewatch this video.

Why You Feel Overwhelmed

You've hedonically adapted to having nothing on your plate, and the Accelerator is going to change that — which is good, but you are not used to it.

“Hedonic adaptation refers to the notion that after positive (or negative) events (i.e., something good or bad happening to someone), and a subsequent increase in positive (or negative) feelings, people return to a relatively stable, baseline level of affect.” Lottery winners = paraplegic.

Juggling

You're balancing so many different things at once.

Have you ever tried patting your head and rubbing your stomach at the same time? It's difficult. That's what Software Engineering Job Acquisition is like. You have to balance tons and tons of things at the same time, which also contributes to that feeling.

🔧 Training Protocol

This is a list of inputs that, if you just hit these every week, you will be successful. But there are a lot of them.

We will discuss every single item in great detail in upcoming modules — but here they are, just so you can keep them top of mind.

1. *Resume + LinkedIn (Monthly) - 30 Mins Per Week*
2. *LeetCode (4x/Week) - 5-6h Per Week*
3. *Mock Interviews (1x/Week) - 1h Per Week*
4. *LinkedIn Connection Requests (2x/Week) - 1h Per Week*
5. *Referral Conversations (2x/Week) - 1-2h Per Week*
6. *Job Applications (3x/Week) - 1-2h Per Week*
7. *Interviews + OAs (2x/Week) - 3h Per Week*

12-14h/Week Total

If it's only 12-14h/week total, then why does it feel so overwhelming?

Because it's split up across 7 different areas and **people don't have any cadence or schedule whatsoever.**

People randomly apply, do OAs, send out connection requests, do LeetCode, etc. **They have no system for it.**

Ideal Weekly Routine

Homework: Open Google Calendar -> Create A New Calendar Called “Ideal Week” -> **Fill Out Your Full Schedule**

Take a Screenshot + Submit In the Form Below

You must include *EVERYTHING* you do on a regular basis. Work / school / gym / sleep / religious commitments...

Scheduling Tips:

1. Once you make and stick to a schedule, life becomes much easier. You learn to expect when things should be done and at what time.
2. You've turned the outcome into an input – **a daily routine**. Just stick to the routine, and you'll get the job. That's it.
3. You can take this as inspiration, but you must create your own routine.
 - a. Early Bird / Night Owl
 - b. Different Work / School Commitments
 - c. Hobbies / Activities
4. This is a marathon, not a sprint. Pick a schedule you can stick to over **6-12 months**

Life Tips:

5. Quit Alcohol, Drugs, and Video Games
 - a. Drinking costs you two days of time. Just quit. Trust me on this.
6. Quit all activities except work/school, fitness, eating healthy, socializing, and sleeping.
 - a. Volunteering
 - b. Running an organization
7. Wake up early
 - a. Get up at 7 am or before
 - b. You give yourself an hour in the morning to get ahead before work and school.
