

U.S. Citizen |

EDUCATION

The Ohio State University, Columbus, OH

Expected Graduation, **May 2026**

Bachelor's in Information Security & Computer Science

- **Morrill Full Tuition Merit Scholarship Recipient & Honors Program**
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems
- **Involvements:** Software Engineering Club, AI Club, Competitive Programming Club, Cyber Security Club
- **Leadership:** Captain of OSU Origins: Nationally Competitive Desi Dance Team, VP of Buckeye Mela Dance Competition

SKILLS

Programming: Java, Python, JavaScript(Node.js, React.js, Vue.js, Angular), HTML/CSS, PHP, SQL, R, C/C++, C#, Swift (iOS), Ruby
Tools: .NET, Google APIs, MySQL, AWS, Git, Junit, Ajax, VS Code, Bootstrap, Spring Boot, Jira, Agile, Redmine, WordPress, G-Suite

EXPERIENCE

Software Engineer Intern | Neumeric Technologies, Irvine, CA

May 2024-Present

- Developed dynamic, responsive web applications for a California-based government agency using React.js, Angular, Node.js, and PHP combined with advanced HTML5/CSS techniques, optimized relational/NoSQL databases for efficient data modeling/integration, enhanced by robust security measures to protect data integrity
- Created and implemented RESTful APIs and GraphQL endpoints for seamless client-server communication
- Deployed and managed applications on Amazon EC2, ensuring high availability and scalability, significantly improved performance by reducing page load time by 35% through CI/CD pipelines & ensuring ADA compliance
- Conducted comprehensive Quality Assurance (QA) testing and utilized Agile methodologies for timely project delivery, and executed SEO strategies to boost search traffic by 50%, serving 2.6 million people in the area

Software Engineer Intern | ScholarshipAuditions.com, Nashville, TN

May 2024-Present

- Developed a streamlined teacher recommendation request system for a startup helping music students find scholarships, resulting in a 30% increase in student engagement and 20% improvement in application success rate
- Utilized React for the student interface & Angular for the admin dashboard, enabling efficient request, receipt, and upload of rec letters, seamlessly integrated with the existing system, streamlining the workflow and data transfer
- Built the backend with Node.js and Express, ensuring secure data handling, scalable architecture, and efficient API endpoints, while integrating dynamic Vue.js components for enhanced interactivity and authentication methods
- Created an automated email notification system using Node.js to remind teachers and band directors to submit letters, improving submission rates & reducing manual follow-ups by 72%, conducted extensive performance testing to ensure the tool could handle high traffic volumes during peak application periods without compromising functionality

Data Science Intern | Bluebonnet Data, Houston, TX

May 2023-July 2023

- Analyzed past and present election/census data to provide inform political campaign strategies for a running political candidate, scraping over 12,000 data entries from voter databases to research electorate behavior and relevant trends
- Created automated scripts to track caucus events utilizing JavaScript, Google Scripts, and API Keys, streamlining data collection using SQL & Big-Query warehouse to develop voter mobilization strategy specific to the candidate's district
- Led multiple candidates to victory ranging from City Council to U.S. Congress, area of focus was on low-income sectors

Artificial Intelligence Researcher | Nationwide Children's Hospital, Columbus, OH

Aug 2022-Dec 2022

- Conducted AI research on early detection of diabetic retinopathy, developing and implementing machine learning models(using TensorFlow and Keras) with accuracy of 91.32% to analyze retinal images with high accuracy
- Preprocessed and annotated large datasets, developed algorithms in Python using pandas, NumPy, and scikit-learn, and leveraged data visualization libraries such as Matplotlib and Seaborn to refine algorithms based on clinical insights contributing to the preparation of research publications under the mentorship of PhD researchers and physicians

Co-founding Engineer | Catch My Bus: School Bus Tracking Software Startup, Columbus, OH

Jan 2022-Present

- Modernizing school bus safety with Bluetooth low energy tracking, enabling real-time monitoring of bus transit
- Received a \$10,000 initial round of funding from investors, in process of developing our mobile app using Flutter, Dart, and Firebase while in communications with local school districts to implement services in the coming school year

PROJECTS

Developer | Indianapolis Food Truck Journey Optimization & Visualization, Indianapolis, IN

Nov 2023

- Utilized Google Places API for robust data collection, extracting key details like food truck names, addresses, and ratings within downtown Indianapolis, implemented an advanced route recommendation system using the Google Directions API, optimizing visitation order and travel time for an enhanced user experience
- Crafted interactive maps with folium/Leaflet.js, featuring markers, highlighted routes, and sequential numbering
