

THE PARETO PROBLEM SET:

LEARN TO PASS 90% OF CODING INTERVIEWS AND CONSISTENTLY SOLVE LEETCODE MEDIUMS

Hi, I'm Aman. I landed 6 high-paying internships at companies like Amazon, Shopify, and HP.

This is the LeetCode roadmap that I used to pass 10+ coding interviews and land a \$168,000* job offer right out of college.

I call it the Pareto Problem Set. If you learn to solve these problems in this order, you will be able to pass over 90% of coding interviews.

Even better, you'll be able to do it faster than if you follow more comprehensive lists like the Blind 75 and The NeetCode 150.

Enjoy!

ARRAYS & HASHTAGS

1. Contains Duplicate ●
2. Valid Anagram ●
